

SVS 2011		
month	Time uncertainty [s]	Data quality comments and issues
January		No data.
February		No data.
March		No data.
April		No data.
May		No data.
June		No data.
July		No data.
August		No data.
September		No data.
October	± 2	Data starts on 10. Many spikes 0.5 nT, probably because of heating or cooling system or old datalogger (likely cooling system), not deleted. Stops on 30. From 30 spikes every hour on the hour, not deleted.
November	± 2	Spikes every hour on the hour, not deleted. From 8 almost daily artificial magnetic disturbance (1 nT amplitude, for about 20 seconds).
December	± 2	Almost daily artificial magnetic disturbance (1 nT amplitude, for about 20 seconds). On 19 stronger magnetic disturbance (visit to the hut?) that possible could include a jump of some 10 nT.
