

THL 2011		
<p>GENERAL COMENTS 2011: All components 0.8 nT p-p noise.</p> <p>Z is often shifted with up to 4 nT for several seconds. Before August 2011: not always corrected (but many spikes > 2 nT corrected). After August 2011: always corrected.</p> <p>On Z characteristic noise with 1 to 2 nT amplitude and 18 seconds period. Often as characteristic 2 hours of noise with three pauses of 8 minutes in the second half. Referred to as 'char noise'.</p>		
month	Time uncertainty [s]	Data quality comments and issues
January	± 2	Char noise on 11?, 21, 23, 24, 25, 28, 30, not deleted.
February	± 2	Char noise on 01, 04, 07, 09, 10, 11, 14, 15, 17, 19, 21, 24, 25, not deleted.
March	± 2	Char noise on many days, not deleted. Spike/shift in Z on 23.
April	± 2	Char noise on many days, not deleted. Noise in Z on 15.
May	± 2	Char noise on many days, not deleted.
June	± 2	Char noise on many days, not deleted.
July	± 2	Very little char noise, not deleted.
August	± 2	Little char noise, not deleted.
September	± 2	Char noise on many days, not deleted.
October	± 2	Char noise on many days, not deleted.
November	from 11 th +2 to -4	Char noise on many days, not deleted.
December	until 8 th +2 to -4	Char noise on many days, not deleted.
